CLEANING & STORAGE

MAINTAINENCE GUIDELINES

Always switch off the Air Cooler and unplug it from the electrical source before cleaning or maintenance. Clean at least once a week, drain the water tank completely and refill with fresh water. Do the cleaning frequently will greatly reduce mineral residue and help to extend the life of the water pad.

STORAGE GUIDELINES

1. Make sure all parts are dry by running the Fan Only mode for about 30 minutes before storing (time depends on ambient humidity conditions).

2. Switch OFF the Air Cooler and unplug from the power supply. Empty/drain all the water from the tank. Clean the water tank with a damp cloth to wipe away any dust or mineral deposits.

3. Remove the water pad from the Air Cooler and rinse under fresh water to remove dust and dirt and put it back into the fuselage. (See Figure A below.) Please do not rub the mesh with your hand to avoid deformation and deformation of the net, affecting the wind direction.

4. To protect the unit from dust and scratches, cover with a clean cloth or plastic bag before storing. Coil the power cord and store it away from the floor to protect it.

WARNING:

Before cleaning the unit, switch the unit OFF and disconnect from the electrical socket. unscrew the water pump knob, pull out the water tank, clean the water tank and put it back, and screw the water pump knob to the water pump. See Figure B below

Refill the water tank with clean water and drain it completely. Refill the water tank with clean water, up to the maximum level. Use a damp cloth to remove the dirt and dust from the surface of the unit. Never use corrosive elements or chemicals to clean this product. When the product is not in use, store the unit in a dry place out of direct sunlight.
